

## A-Lion 3000

### Technical Parameters:

Working platform length	-----5500mm(18' / 216.54")
Working platform width	-----2000mm(6.6' / 78.74")
Working platform height	-----430mm-1000mm (1.4' / 16.93"-3.2'/39.37")
Working platform thickness	-----140mm (0.5' / 5.51")
Hydraulic system max working pressure	-----70MPa
Tower column oil cylinder pulling capacity	-----10MT(9.8 KN)
Tower column pulling range	-----360°
Drive air source pressure	-----0.7MPa
Max lifting weight	-----3000KG(6613 lbs)
Equipment gross weight	-----2950KG(6502 lbs)

A- Lion 3000 enjoys the following Features:

- 1, The platform can be adjusted up and down synchronously according to different requirements.
- 2, Excellent movable ten-ton tower 360 pulling operation, freely and flexibly. The hydraulic cylinder works vertically without any components force consumption, powerful and accurate tensile force.
- 3, Advanced universal clamping system is available for various vehicles, with these high-precision clamps, you can quickly anchor any vehicles rock-solid.
- 4, Hydraulic system imported from ENERPAC USA, powerful and reliable. With high-strength clamp chains and entire series of pulling accessories, you can almost recover any car distortion with ease.
- 5, High-precision aluminum alloy 3D measuring system.
- 6, Provide all series of auto database from Mitchell USA and some other auto companies.
- 7, Many humanity engineering design for user to operate easily and comfortably.
- 8, Elegant technique is incomparable.
